

# NEOPRENE ROLL

---

## ◆ Short Description (Beside Product Image)

Industrial-grade neoprene roll designed for sealing, insulation, cushioning, and vibration dampening across construction, HVAC, automotive, and industrial applications. Manufactured from durable closed-cell neoprene material offering excellent resistance to moisture, oils, weathering, and temperature variations.

## ◆ Product Overview

Neoprene rolls are versatile rubber materials widely used for sealing, gasketing, insulation, and protective cushioning. The flexible closed-cell structure provides excellent resistance to water absorption, air leakage, and environmental exposure.

These rolls can be easily cut, slit, or die-cut into strips, pads, or custom gasket shapes depending on application requirements.

Canco Fasteners supplies neoprene rolls in multiple thicknesses, widths, and density grades to support OEM manufacturing, distributor supply chains, and bulk export requirements.

## ◆ Quick Specifications

### Material

Closed-cell Neoprene Rubber

### Colour

Black

### Thickness Range

Available in multiple thickness options depending on application requirements.

### Width Options

Standard and custom widths available.

### Roll Length

Supplied in standard roll lengths or custom sizes as required.

### Temperature Resistance

Suitable for a wide temperature range typically used in industrial environments.

## **Customisation Availability**

- Custom thicknesses
- Custom widths and roll lengths
- Adhesive backing options
- Die-cut gaskets or strips
- Private-label packaging
- Bulk export configurations

## **Technical Specification Sheet**

### **Neoprene Roll – Technical Data**

#### **Product Description**

Flexible rubber roll designed to provide sealing, cushioning, thermal insulation, and vibration control between surfaces.

#### **Material Composition**

Manufactured from closed-cell neoprene rubber providing durability, moisture resistance, and excellent weather resistance.

#### **Manufacturing Process**

- Rubber compounding
- Foaming and sheet formation
- Precision rolling and cutting
- Dimensional inspection and finishing

#### **Dimensional Control**

Manufactured to specified thickness and width tolerances according to industrial requirements or approved customer specifications.

#### **Testing & Inspection**

- Dimensional verification
- Material density testing
- Visual inspection
- Quality assurance checks

#### **Typical Applications**

- HVAC insulation and sealing
- Gasket manufacturing
- Industrial vibration dampening
- Automotive insulation
- Construction sealing and cushioning
- Electrical enclosure sealing

## Export & Packaging

Available in:

Standard rolls

Custom roll sizes

Private-label cartons

Bulk export packaging

Canco Fasteners supplies neoprene rolls for OEM manufacturing, industrial distribution networks, and containerised export shipments.
