

# STRUT CHANNEL

---

## ◆ Short Description (Beside Product Image)

Cold-formed strut channel designed for structural support, framing, and mounting applications in construction, electrical, HVAC, and industrial installations. Manufactured from high-quality steel with corrosion-resistant finishes and precision slotting for versatile assembly.

## ◆ Product Overview

Strut channels are widely used as a structural framework to support piping systems, cable trays, ducting, and equipment. The channel profile allows easy installation of fittings, clamps, and brackets without welding. Canco Fasteners manufactures strut channels as per international standards or customer drawings, supporting OEM programmes and bulk supply requirements.

## ◆ Quick Specifications

### Material Options

- Carbon Steel
- Pre-Galvanised Steel
- Stainless Steel (AISI 304 / 316)
- Other grades on request

### Surface Finish Options

- Pre-Galvanised
- Hot-Dip Galvanised
- Powder Coated
- Plain / Self-colour
- Custom coatings available

### Size Range

- Standard widths: 41mm, 21mm, 62mm (typical)
- Thickness: 1.5mm to 3.0mm
- Length: Standard 3m, 6m or custom lengths

### Standards

- Manufactured as per industry standards or customer specifications
- Compliance documentation available on request

### Customisation Availability

- Custom dimensions and slot patterns

- Material grade selection
- Special coatings
- Private-label packaging

## **Technical Specification Sheet**

### Product Description

Structural channel used for support systems in mechanical and electrical installations.

### Manufacturing Process

- Roll forming
- Punching / slotting
- Cutting to length
- Surface finishing

### Material Grades

- Mild Steel
- Stainless Steel 304 / 316
- Other grades on request

### Surface Finishes

- Pre-galvanised
- Hot-dip galvanised
- Powder coated
- Custom finishes

### Dimensional Control

Manufactured to strict tolerances as per approved drawings or standards.

### Testing & Inspection

- Dimensional inspection
- Surface finish check
- Material certification (EN 10204 3.1 on request)

### Typical Applications

- Cable tray support
- Pipe support systems
- HVAC installations
- Electrical framing
- Industrial structures

### Installation Note

Compatible with standard strut fittings, brackets, and accessories for quick assembly without welding.

## Export & Packaging

- Loose bundles
- Palletised loads
- Custom packaging
- Bulk export supply

Canco Fasteners manufactures strut channels strictly to approved standards or customer drawings. Products are available for OEM programmes, distributor supply, and export shipments.
